body mapping solution

IMAGING EXCELLENCE FROM
 **CANFIELD**

VECTRA 3D whole body imaging system

The ground-breaking VECTRA WB360 instantaneously records the patient's entire exposed skin surface and body shape with a single capture.

With 46 stereo vision pods, VECTRA WB360 produces a single, accurate high-resolution 3D image. The WB360 uses both cross-polarized and non-polarized lighting, developed specifically for capturing photographs of the human body.

- *On-board proprietary xenon flashes, tuned to whole body skin imaging*
- *Patented 3D cross-polarized lighting improves lesion assessment*
- *Simplified and standardized patient photography*
- *Minimized photography time*
- *Reduced patient anxiety*
